Coding for Kubo-Greenwood Method

I. Parameter setting for KG method

II. Coding for KG method

III. Computational Result

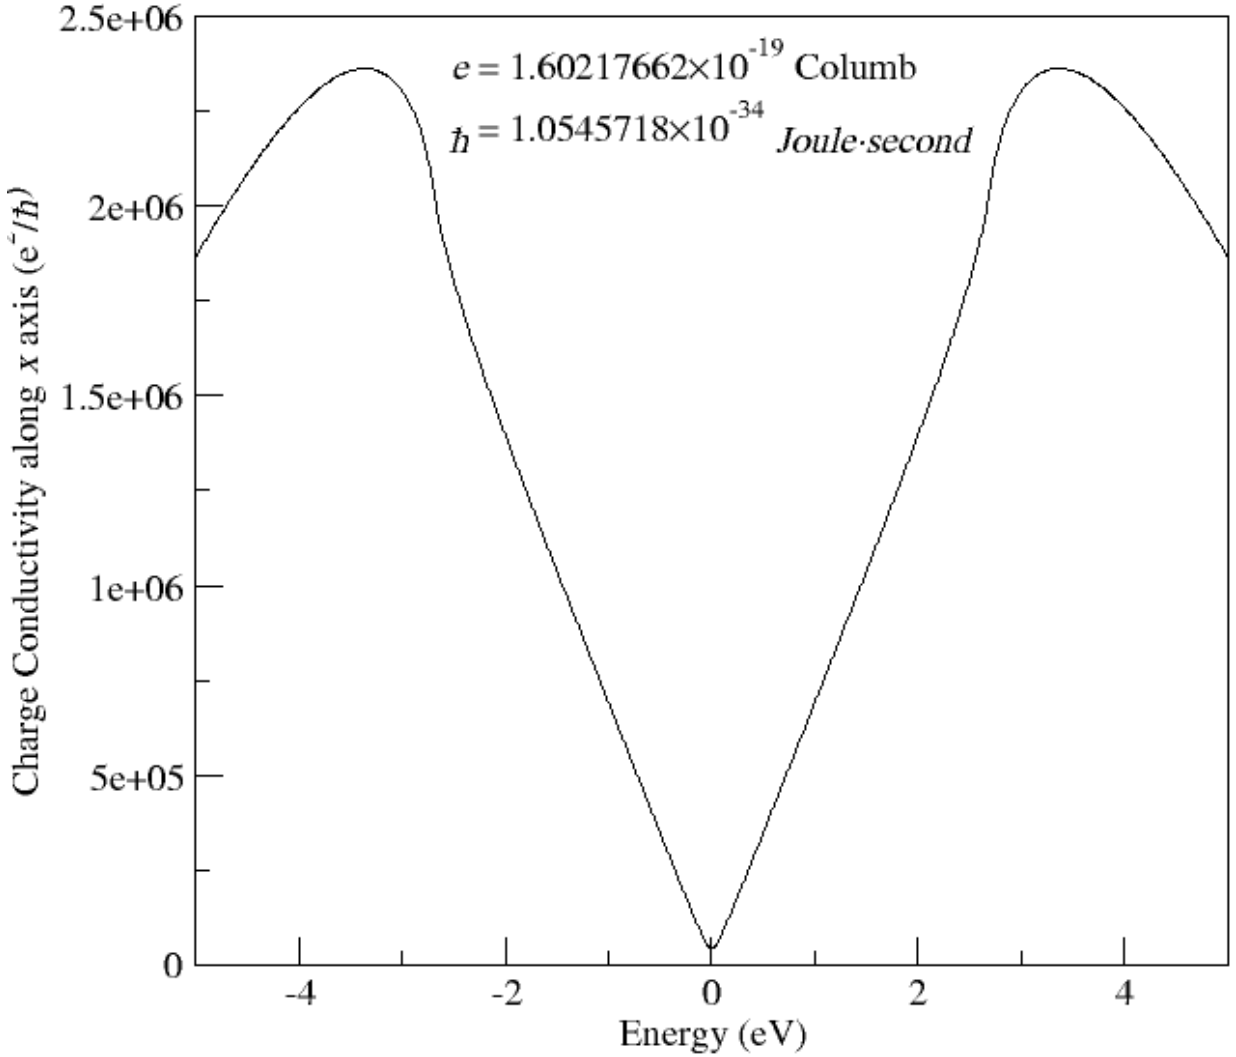

I. Parameter setting for KG method

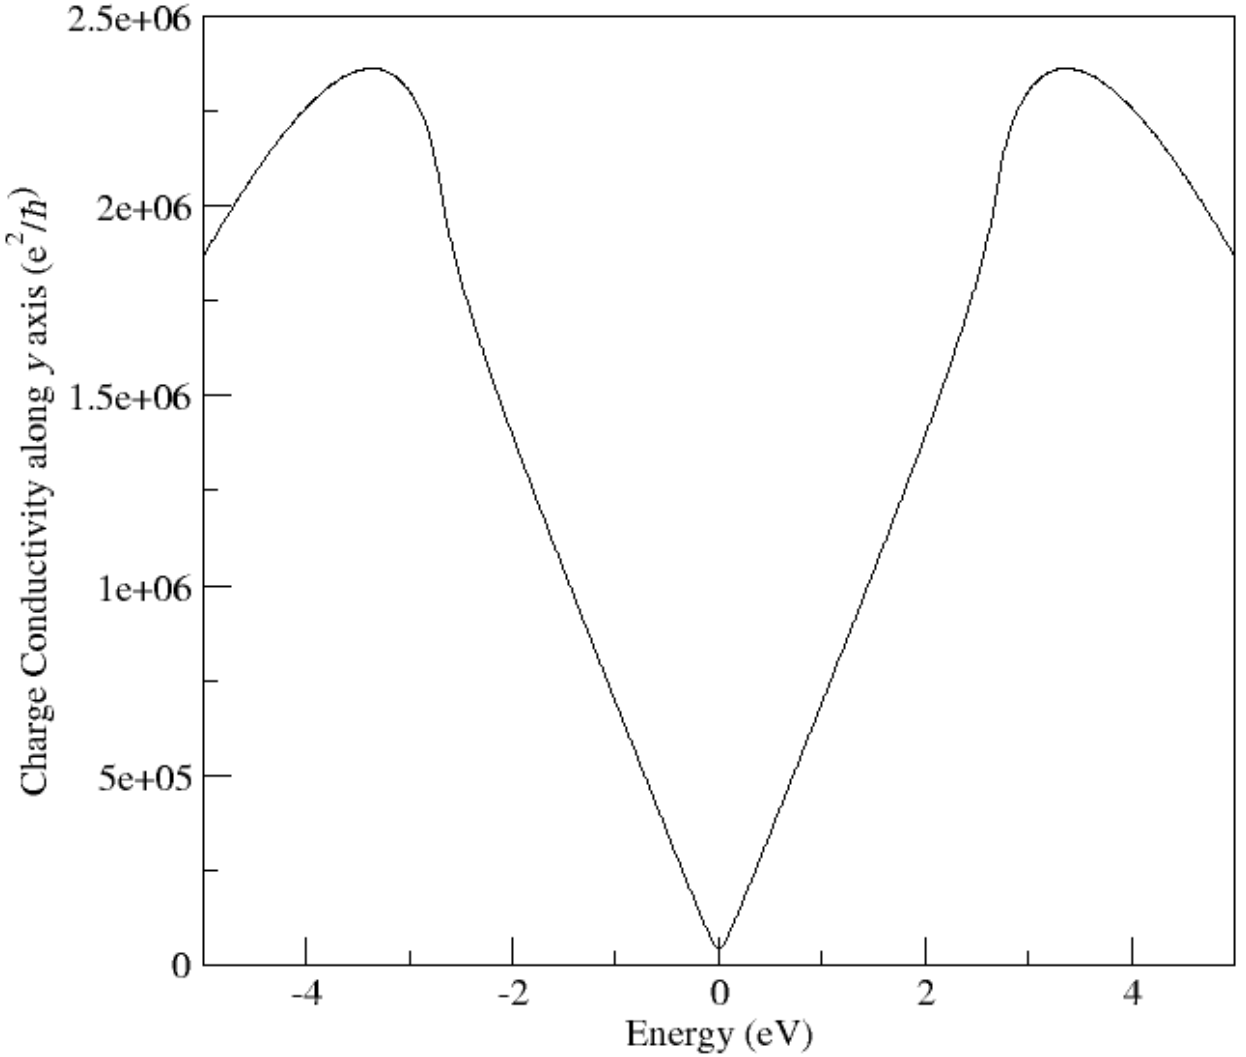

!!!!!!!Kubo Greenwood Method!!!!!!!!!
k point mesh for Kubo Greenwood method: 500 500
broadening value for Kubo Greenwood method: 0.05
Energy range for Kubo Greenwood method: -5.0 5.0
Energy point for Kubo Greenwood method: 1000
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

II. Coding for KG method

Refer to the Fortran Code

III. Computational Result

That's all for this session

Thank you for your attention and great participation
